

Dyslexia Program

OVERVIEW

The Dyslexia Training Program is a multisensory curriculum based on the Orton-Gillingham approach to teaching the structure of the English language. The program is a comprehensive and systematic approach to teaching. The entire scope and sequence is designed for students with dyslexia and is presented in a structured and sequential manner. This reinforcement and repetition helps create an atmosphere of security and consistency for the student.

This program meets all the guidelines set forth by the Texas Education Agency for remediating students with dyslexia. Direct instruction is provided by an experienced, trained Dyslexia Therapist.
