

Adding Two I's to Your Reports:

Interpretation & Instruction

This workshop will focus on two main areas of report writing: interpretation and instructional relevance. First, we will explore and practice translating test results into interpretive versus descriptive statements. Next, we will focus on identifying instructional needs and practice incorporating information into report writing. Participants need to bring a recent evaluation report (FIE) with them in order to practice applying workshop information to an actual report.

April 23, 2010

9:00am to 4:00 pm

at Region 18 – ESC - Theater

Presenter:

Barbara Wendling
